

SIMRANJEET SINGH

Senior Fullstack Engineer

@ smrnjeet.dev@gmail.com jeet22.xyz smrnjeet222 smrnjeet_22 in smrnjeet222 smrnjeet_22 Delhi, India

PROFESSIONAL EXPERIENCE

Senior Software Engineer - (Solidity, NestJS, Next.js)

Mon Protocol

Dec. 2023 – Present Remote, Singapore

- Developed and deployed **smart contracts** for **MON token launch**, including **pre-sale**, **staking**, and **claims**, securing \$30M+ in deposits.
- Engineered **backend infrastructure** for token lifecycle, optimizing performance and reliability across services.
- Implemented engaging **pre-sale** and **questing systems**, increasing user interaction and token distribution efficiency.
- Built full-fledged **backend systems** for **launchpools** and staking, integrated with blockchain components.
- Tech used: AWS, NestJS, Redis, Next.js, Tenderly, Solidity, Omnichain

Senior Fullstack Engineer - (React Native, React.js, Solidity)

Pop Social

Dec. 2022 – Jan. 2024 Remote, Dubai

- Developed the decentralized SocialFi app **Pop** with integrated Web3 features, driving 34% user growth.
- Built in-app **web3 wallet** supporting multiple EVM chains and integrated staking, airdrops, and token launch flows.
- Created an on-chain **NFT marketplace** and **Dynamic Avatar NFT** system, generating solid revenue post-launch.
- Engineered a **web3auth**-like login for password-free wallet access.
- Boosted React Native performance with optimized caching, increasing average session time by 35%.
- Tech used: RNUIlib, ethers.js, metamask-sdk, web3auth, walletconnect, graphql, tailwind, zustand, react-query, IPFS, subgraphs

Fullstack Developer - (React.js, Node.js, Subgraphs)

Colexion

June 2022 – Dec. 2022 Gurgaon, India

- Built core APIs for the **TopRun Fantasy Game**, supporting thousands of daily players.
- Migrated backend from MongoDB to PostgreSQL via **sequelizeORM**, implementing efficient **SQL schemas** and data strategies.
- Built frontend and contracts for an NFT Marketplace; deployed an NFT Admin Dashboard powered by subgraphs.
- Tech used: sequelize, PostgreSQL, ethers.js, tailwind, IPFS, subgraphs

Solana Fullstack Developer - (Solana, React.js, Firebase)

Cykura

June 2021 – July 2022 Remote

- Built **CycloSwap**, the **first concentrated liquidity AMM** on Solana.
- Developed **dynamic price charts** and **SVG NFTs** with real-time data.
- Created an advanced indexer for **TVL/Volume analytics**, monitoring real-time protocol activity.
- Tech used: candy machine, hasura, cloud-functions, styled-components

OPEN SOURCE VISIT

- QuickSwap / interface-v2 Visit
- project-serum / swap-ui Visit
- processing / processing-website Visit

KEY ACHIVEMENTS

- Engineered staking + presale contracts and frontend that handled over \$30M+ in total deposits.
- Enhanced Web3 features in the PopSocial app - increased user growth by 34%.
- Delivered frontend systems with sub-100ms interaction latency, leading to a 35% increase in average user session time on the app.
- Built the 1st concentrated liquidity **AMM on Solana**.

TECH STACK

React | Typescript | Solidity | Solana (Rust) | Go

Web3

- Smart Contracts:** Solidity , Huff , Solana , Anchor
- Infra:** Subgraphs, Rollups, Cosmos, Hardhat/Foundry
- Protocols:** IPFS , Chainlink , Hyperliquid , LayerZero

Frontend

- Frameworks:** Next.js , React Native , Vite , TanStack ...
- Styling:** Tailwind CSS , shadcn , Mantine , styleX ...

Backend

- Languages/Frameworks:**
 - Golang:** Fiber , Gin , Echo , Gorm , SQLC , Beaver
 - Node.js:** Express.js , NestJS , Fastify , Hono , Deno
- APIs:** REST , tRPC , JSON-RPC , websockets
- Databases:** PostgreSQL , Redis , Kafka , RabbitMQ

DevOps & Infrastructure

- AWS , Docker , Cloudflare , Stripe , Grafana

PROJECTS

oxbin - an onchain pastebin — Go , Sui Visit

- Built in ETHGlobal New Delhi 2025 Hackathon.
- A terminal-based decentralized file sharing app.

SAFU PASS — React.js , Solidity , Subgraph Visit

- Built in ETHIndia 2023 Hackathon.
- On-Chain password manager.

nUSD StableCoin — Solidity , Foundry

- Algorithmic Stablecoin protocol similar to DAI. Visit
- Its a minimal stablecoin system based on the Maker-DAO DSS system i.e Exogenously Collateralized and Dollar Pegged, but without any governance.
- Deposit - Burn - Liquidate UI interactions. Visit

Grid1 — React.js , Solidity , Subgraph Visit

- Built in ETHIndia 2022 Hackathon.
- A Forkable-NFT Collection builder dapp deployed on Polygon Mainnet.

Ethernaut Solutions — Solidity , Security

- Solving Solidity based wargame, hacking, and learning various smart contract exploits.
